MGX

Rugged Yet Compact Design

Non-contact measurement
Full strip profile displayed
Touchscreen display
Easily installed and maintained
Networkable

Remote support
Data logging
Portable

Contact us for more info or to order an MGX

Go flat out with the MGX

- Laser measurement for unmatched precision: Laser sensors measure the thickness of samples. Removes the need to rely on inaccurate hand micrometer measurements and slowing down production with manual product quality checks.
- Side to side thickness measurement: Scanning laser heads measure thickness across individual strips. Avoids relying on the outside strips to control your process.
- **PLC Connection:** Engineered to blend seamlessly into your production line, the MGX can connect directly to your PLC. This makes for centralized control and easy changes in product specifications and gauge settings. With built-in Ethernet ports, it's as simple as plug in and go.
- Monitor thickness measurement in real-time: Our on-screen data visualizations are purpose-built for operator ease. Monitor real-time thicknesses and run charts of multiple locations across your product. Automatically connect to your existing systems to set thickness targets and key thresholds. Be immediately notified by on-screen alarms when issues arise.
- Keep an eye on your lines without leaving your desk: You'll have full access to real-time measurement data, as well as the ability to track trends over run-time and perform data file downloads. All of this with ironclad security your data is only accessible via your facilities local network.
- Ease of use and stress-free maintenance: The belt-driven, single actuator includes built-in centering for in-field positioning. Calibration, using the NIST-traceable master calibration block, only needs to be done once every 3 months. The laser sensors' modular design and quick electrical disconnects means, when needed, they are quickly and easily replaced. The belt-drive actuator design is familiar making it easy to maintain.
- Monitor and reduce dirt accumulation: When the sensors get dirty, our alert system makes sure you're immediately notified. Dirty sensors are easily retracted and quickly cleaned with no disruption to your production line. The actuator's overhead position, located away from materials, reduces the risk of particulates entering the drive system and helps eliminate failure points.

MGX Technical Specifications

THICKNESS MEASUREMENTS DETAILS

Resolution	0.5 <i>μ</i> m	[0.00002 in]	
Accuracy (typical)	1 <i>µ</i> m	[0.00004 in]	
Stroke	254 mm	[10 in]	
Scanning Speed	150 mm/sec	[6 in/sec]	
Thickness Range	0 to 10 mm	[0 to 0.4 in]	
Measurement Frequency 1 to 5 kHz			

SUPPLY REQUIREMENTS

Power 2A @ 110V/60 Hz 1A @ 240V/50 Hz

WEIGHT

Complete Assembly 10 kg [22 lbs]

PHYSICAL DIMENSIONS

Main Housing 355x457x254 mm [14x18x10 in]

ENVIRONMENTAL REQUIREMENTS

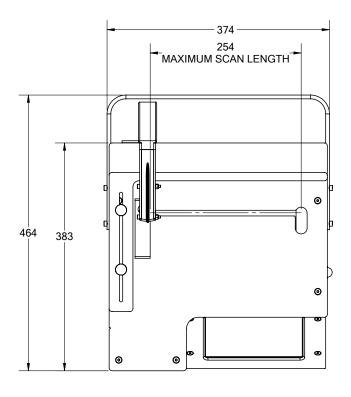

Operating Temperature 10 °C to 50 °C [50 °F to 120 °F

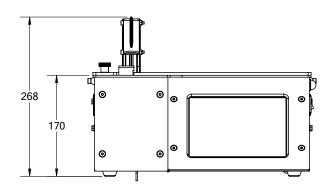

Humidity < 90%

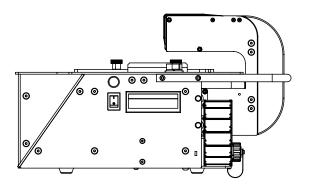

OPTIONAL CONFIGURATIONS AND PART NUMBERS

Item	Part Number	Description
1	10041300	MGX - Standard Build
2	10041550	MGX - Extended Range (0-16 mm)

MGX Schematics

MGX Controls and Displays

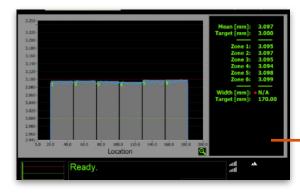

Purpose-built for operator ease

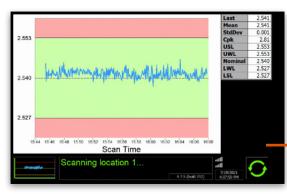

Large numerical display

Needle gauge location showing left-right thickness

View thickness of sample in a range of zones

See sample thickness over time

Not sure which Mate Gauge is right for you? Check out our other

Compact and lightweight

The MG1 provides thickness measurement solutions that fit your floorspace and budget.
